

Geography

Year 2 Spring Term — **Continents**

Location

Thinking like a Geographer:

	Map skills and Field-work		Space		Scale
--	---------------------------	--	-------	--	-------

Enquiry/ Fieldwork

- Investigate: What animals live in each continent, and how does climate effect them?

Retrieval and review

- Four countries that make up the UK– England, Scotland, Wales and Northern Ireland
- The physical and human features
- That hot places are closer the equator and colder places are closer to the North and South Pole. The weather also impacts the physical features found in that location

Essential Knowledge

- Know the seven continents of the world: Europe, Africa, North America, South America, Asia, Antarctica and Australasia.
- Locate these on a world map.
- Know the compass points north, south, east and west.
- Know the five oceans of the world: Pacific Ocean, Indian Ocean, Atlantic Ocean, Southern Ocean and Artic Ocean.
- Locate these on a world map.
- Know that continents have different climates
- Know that climates impact on plants and
